

SNOW MOLD ASSURANCE PROGRAM

PROVEN PERFORMANCE. PEACE OF MIND.

The AMVAC Snow Mold Assurance Program takes the uncertainty out of snow mold protection. Instead of trying to predict weather conditions, superintendents now have a stress-free way of controlling pink and gray snow mold on greens, tees and fairways. The AMVAC program provides everything you need for Opening Day 2019, to ensure your course opens with unsurpassed playability.

AMVAC® PREVENTIVE SNOW MOLD RECOMMENDATIONS—TURFCIDE® OR PREMION™ ALONE

Greens	120+ days of control	TURFCIDE 6 – 8 fl. oz. per 1,000 sq. ft.* PREMION 8 – 12 fl. oz. per 1,000 sq. ft.

Greens	120+ days of control	TURFCIDE 6 – 8 fl. oz. per 1,000 sq. ft. + _____ fl. oz. per 1,000 sq. ft. PREMION 8 – 12 fl. oz. per 1,000 sq. ft. + _____ fl. oz. per 1,000 sq. ft.
Fairways	120 days of control	TURFCIDE 12 – 16 fl. oz. per 1,000 sq. ft. + _____ fl. oz. per 1,000 sq. ft. PREMION 8 – 12 fl. oz. per 1,000 sq. ft. + _____ fl. oz. per 1,000 sq. ft.

PCNB-POWERED PRODUCTS OFFER—SUPERINTENDENTS

- Outstanding Value
- Long Lasting Snow Mold Control Products
- Proven Product Performance
- The Foundation of your Snow Mold Solutions Program

KEY AGRONOMIC PRACTICES:

- Give your snow mold application an advantage by utilizing a fall clean up application to control cool season disease
- Summer stresses, such as plant diseases, take a toll on turf grass health. Give your turf grass the best chance for recovery with best timed clean up sprays and snow mold applications
- Apply snow mold applications prior to snowfall as a single or a split application
- Additional applications may be necessary in absence of permanent snow cover

- Purchases totaling \$5,000 +, you earn additional rebates of 3 %

AMVAC SNOW MOLD ASSURANCE PROGRAM-TERMS AND CONDITIONS

User must follow prescribed guidelines herein regarding application rates and timing for the user's region and apply on a minimum of three acres of greens or 20 acres of fairways in order to qualify for the AMVAC Snow Mold Assurance Program. Program purchases must be made between September 8, 2018 and November 21, 2018 and product applications must be made between September 8, 2018 (high elevation areas) and December 15, 2018 ("Qualifying Period"). All claims must be reported to and submitted in writing to your AMVAC territory manager within two (2) weeks after snowmelt and no later than April 30, 2019. In the event you notify your AMVAC territory manager of snow mold breakthrough exceeding 15%, an AMVAC representative will investigate and, if warranted, supply AMVAC products for application replacement with a value not to exceed the value of the AMVAC products already purchased and applied by user on the applicable acreage during the Qualifying Period. A "Breakthrough" is defined as more than 15% occurrence of snow mold control as compared to untreated areas of similar turf density, turf type, and environment at the sole discretion of the AMVAC representative. AMVAC's determination as to whether less than acceptable control exists will be final. AMVAC retains the right to audit purchase records in assessing claims made pursuant to the Program. AMVAC will not pay for any application for rescue treatments. Cultural practices, mechanical issues or any other factors that are deemed contrary to standard practices and methods for preventive snow mold control will render the claim ineligible. AMVAC reserves the right to modify or discontinue this Program at any time without prior notice.

BREAK THE SNOW MOLD

37 field trials. 97.7% snow mold control. There's a reason superintendents trust Turfcide and Premion fungicides. Contact an AMVAC distributor for official terms and conditions and to learn more.
