

AN ANTHRACNOSE PROGRAM WITH PROOF.

Premion delivers unique answers, thanks to a cutting-edge combination of tebuconazole (FRAC Group 3) and PCNB (FRAC Group 14).^{**} This Premion fungicide rotation program was developed in accordance with best management practices:

- Do not repeatedly apply fungicides within the same FRAC Group.
- Tank mixing and alternating fungicides with proven efficacy against the target disease reduces the potential for resistance to develop, and improves disease control.

AMVAC ANTHRACNOSE PROGRAM – POWERED BY PREMION™ | 14-DAY APPLICATION INTERVAL

Application	Product	Active Ingredients	FRAC Group	Formulation	Application Rate
					Product / 1,000 SQFT
First*	Premion™	PCNB	14	4.265SC	6 to 8 fl.oz.
